Noha Tilahun

Data Analytics | AI Data Annotation | Python & SQL

nohabig3@gmail.com +251925400140 addis ababa GitHub Linkedin Tableau

Profile

Computer Engineering student with hands-on experience building Python-based data, machine learning, and software projects. Experienced with Python, SQL, PostgreSQL, FastAPI, Pandas, data analysis, machine learning, and AI/LLM applications. Projects include automated data-cleaning pipelines, e-commerce revenue intelligence, fraud detection, and AI-powered automation. Strong interest in technical problem-solving, AI systems, and designing reliable, testable solutions.

Education

Electrical and Computer Engineering, 2023 – Present
Addis Ababa Science and Technology University

Data Science, Data Analytics, web scraping, NLP and deep learning, *10 Academy* 2024 – 2025

nano degree in fundamental of Data science and Data Analysis, *Udacity* 10/2024 – 12/2024

Google Data Analytics, *Coursera* 09/2025 – 2026

Professional Experience

Freelance — AI Data Annotation & Language Specialist 08/2025 – Present

- Perform English and Amharic data annotation and language-data tasks for AI-related projects.
- Transcribe audio, identify speakers, add timestamps, and label audio events.
- Review and validate annotated data to improve accuracy and consistency.
- Apply quality-assurance practices when reviewing language and audio datasets.
- Work independently on remote, project-based assignments while following task-specific guidelines.

R&D Group — Data Labeling & Annotation 2026 – Present

- Perform data labeling and annotation tasks according to defined project guidelines and quality requirements.
- Categorize, review, and validate datasets to improve consistency and accuracy for AI/ML applications.
- Apply careful attention to detail when identifying and classifying data according to annotation requirements.
- Review annotated data and maintain quality standards throughout assigned tasks.
- Work independently in a remote environment while following project instructions and meeting assigned requirements.
- Develop a practical understanding of how high-quality labeled datasets support machine learning model development and evaluation.

Freelance Amharic Audio Transcription

- Produced accurate Amharic transcripts for AI language datasets.
- Reviewed and corrected AI-generated transcripts.
- Identified speakers and background audio events.
- Maintained confidentiality while following strict quality standards.

Projects

E-commerce Revenue Intelligence ,
2025 – Present

Python | *SQL* | *PostgreSQL* | *Tableau* | *Streamlit* | *FastAPI*

- Built an end-to-end analytics pipeline for e-commerce transaction data using SQL and Python.
- Performed customer segmentation, RFM analysis, revenue analysis, and behavioral analysis.
- Designed reusable SQL/Python workflows for data preparation and analytical reporting.
- Developed interactive dashboards and application components to communicate analytical findings.
- Investigated data-quality and evaluation issues to validate analytical results.

Python Data Cleaning Automation , *Python* | *Pandas*

- Built a Python-based workflow for cleaning and validating messy datasets.
- Applied automated data-cleaning techniques to improve consistency and reduce repetitive manual work.
- Compared raw and cleaned datasets to verify transformation results.

Fraud Detection for Banking System ,

Python | *Pandas* | *Scikit-learn* | *Random Forest* | *SHAP* | *LIME*

- Built a machine-learning workflow for identifying potentially fraudulent transactions.
- Applied feature analysis and model evaluation to investigate fraud-related patterns.
- Used SHAP/LIME-based explainability techniques to examine model predictions and feature contributions.
- Investigated model behavior and potential sources of evaluation error.

HR Analytics SQL Project , *SQL* | *Data Analysis*

- Used SQL queries to analyze HR-related data and extract patterns relevant to workforce analysis.
- Applied filtering, joins, grouping, aggregation, and subqueries to answer analytical questions.

AI Lead Response System , *Python* | *FastAPI* | *LLM* | *n8n* | *Telegram API*

- Built an AI-powered lead-response system that classifies incoming messages and identifies customer intent and priority.
- Developed a Python/FastAPI backend for processing messages and generating responses using a locally hosted language model.
- Integrated the system with an n8n automation workflow and Telegram.
- Designed the workflow to handle classification, signal extraction, and automated response generation.

Skills

Programming
Python, SQL, C++, Java, JavaScript

AI / Machine Learning
Machine Learning, NLP, Deep Learning Fundamentals, Model Evaluation, SHAP, LIME

Environments
- Jupyter Notebook, Google Colab, Ubuntu/Linux

Soft Skills
- Analytical Thinking
- Problem Solving
- Attention to Detail
- Communication
- Team Collaboration
- Adaptability
- Time Management

Data
- Pandas, Excel, PostgreSQL, Data Cleaning, EDA, Statistical Analysis

Visualization
Tableau, Dashboard Development

Software Engineering
- FastAPI, REST APIs, Git, GitHub

Data Visualization
- Tableau
- Dashboard Development
- Data Visualization

Certificates

- Google Data Analytics Professional Certificate
- Data Annotation
- Udacity Nanodegree
- Python Programing
- M_Academy Training
- Data Analysis Fundamental
- 10 Academy

Languages

- English
- Amharic
